

# STANDARD'S LEAD SHEETS THE LEAD LINE-UP OF PRODUCTS AND PROCESSES

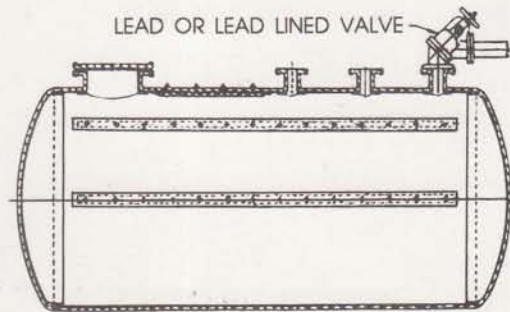

DESIGNING, FABRICATION & LINING UNDER ONE ROOF.

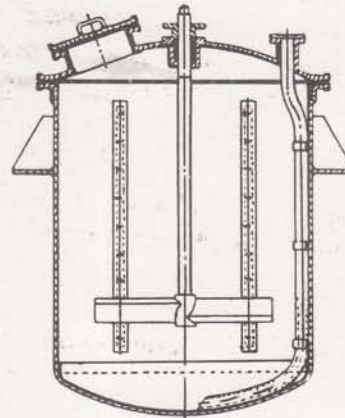

LEADLINED STEEL SECTIONAL TOWER SHOWING ANTIMONIAL LEAD TRAYS & BUBBLE CAPS.

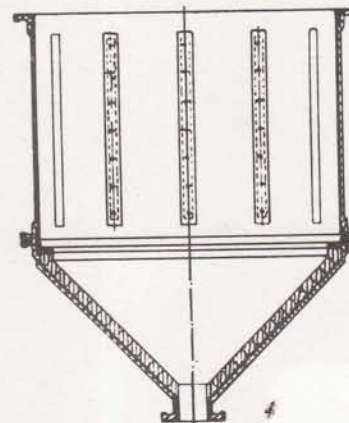

DESIGNING AND FABRICATION of M.S. & S.S. vessels, reaction kettles, heat exchangers, etc. ... Also LINING in lead, rubber, F.R.P. and P.V.C. all under our roof or yours.

STEEL LEAD LINED HORIZONTAL TANK WITH DISHED HEADS & SUPPORTING LEAD LINING

STEEL LEAD LINED VERTICAL DISHED BOTTOM TANK SHOWING STUFFING BOX LEAD COVERED AGITATOR & BLOW PIPE.

STEEL LEAD LINED VERTICAL CONE BOTTOM TANK SHOWING BRICK LINING IN CONE PORTION TO RESIST ABRASION . NOTE STRAPPING IN SHELL.

### HEMENDRA METAL INDUSTRIES.

OFFICE : 17, Patthe Bapurao Marg (Tardeo Bridge),  
Near Diana Cinema, Mumbai 400 034.

Telefax : (O) 381 1916

WORKS : 231/1, GIDC, Selvasa Road, Dist : Vapi 396 195,  
GUJARAT STATE.

# PIPES THAT LEAD

The Lead line-up  
of Products and  
Process

1. Extruded Lead Rod from 12 mm. dia & above
2. Extruded Lead Pipe from size : 10 mm ID, to 300 mm. OD.
3. Extruded Lead section Plain/Corrugated for Lead Anodes
4. Extruded Lead Channel
5. Extruded Star Shape Pipe
6. Extruded Gear Shape Pipe
7. Extruded Internal Star Shape
8. Extruded Corrugated section in CHEMICALLY PURE ANTIMONIAL & TIN LEAD AS PER PARTY'S REQUIREMENT

A. **Standard's** Lead Coil finds application as excellent Heating/ Cooling media.

B. **Standard's** Lead Sleeving render perfect service for splicing of lead-coated telephonic, telegraphic and electrical power-lines.

C. **Standard's** Seamless 12" Lead Acid Line is of primary importance in the leaching plant of copper refineries. Also in Rayon Mills, Chemical Factories, Acid Plants, Electrolytic Metal Refineries, Pulp and paper Plants and umpteen other industries.

D. **Standard** Piping in a pulp mill Carrying Corrosive acids from main Tank to different places

E. **Standard** Piping in a pulp paper mill. Standard's Lead filter units as tank bottoms in a sulphite pulp system.

# STANDARD'S VALVES, FITTINGS, ANODES, BRICKS & SPECIAL LEAD CASTINGS

**STANDARD'S Other Lead Products**

- A. Lead Bricks used as Radiation Shields in ATOMIC POWER STATIONS and other Nuclear Facilities for Industry and Research.
- B. Further Standard's Radiation Shielding ancilliary materials such as the interlocking Lead Bricks are used for protection.
- C. Custom built Lead shield castings are also fabricated at our plants. The minutest exactions of design and quality are achieved as per specifications.
- D 1. Lead Anode used in Manganese Refining
- D 2. Lead Anode used in Electrolytic Refining of Copper,

E. Lead pipe fittings & M.S. pipe fittings with lead pipes inserted inside for multifarious industrial uses.

F. Standard's star shape lead Anodes as per client specification

# Heating or Cooling-Standard's Lead Coil, Heat Exchanger, Lead Tube Plate and M. S. Lead Bonded coils.

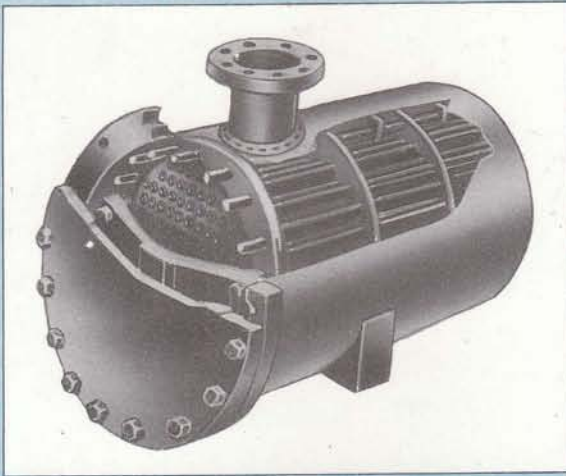

Condensation / Vapourising Lead Coil  
with Wooden, Lead, M. S. Lead Bonded,  
Poly Proplene and S. S. Supports

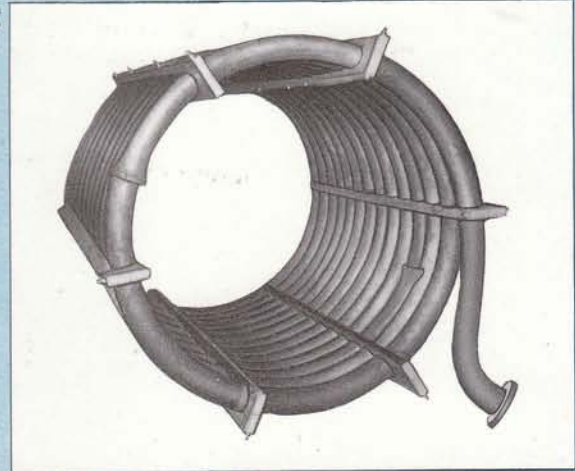

A

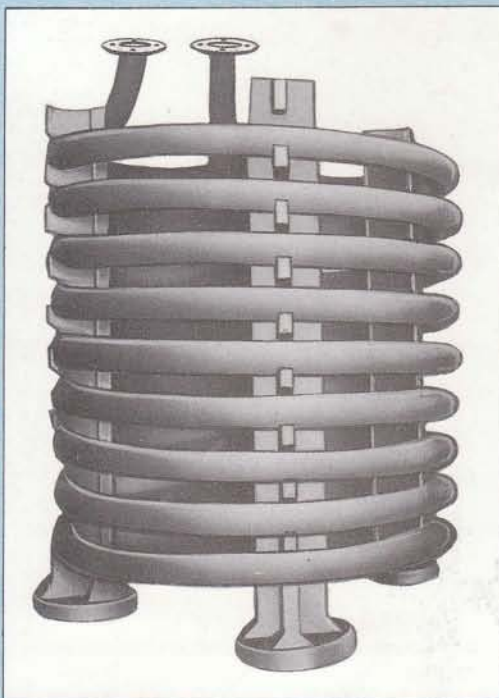

B

C

D

- A — Lead heat exchanger coils for hot dimethylaniline sulphate.  
 Inset: Cross-Section of coil. Area of space between the pipes equals inside area of the finned pipe
- B — Floating head and shell cover construction.
- C — Lead Cooling Coil D - Lead Heating Coil
